The personal story of "Fifi"

Chuck Phillips:

My dad lost his standard poodle to this she was 9 years old. Dad had given this drug Bravecto to her on a Monday and she past on Wednesday. She was so loved she went for rides every night she was my dad's best friend. They did every thing together.

Her name was Fifi she was such a good girl very loving and very smart. This should not had happened.

She went from being happy and going for a ride to and hour or so later just fell over with a loud voice and she was gone that fast. He wanted you all to know that he feels sorry for you all because he knows how y'all feel.
