

**BRAVECTO - Serious side effects**  
**The personal story of "Nina" (Mini Schnauzer)**  
**(019)**

**Jaime Doise – June 17, 2016**

A piece of my heart is shattered into a million pieces this morning. My 10 year old mini Schnauzer Nina passed away last night from complications from a ruptured Spleen & bled internally.

I am confident that Bravecto (manufactured by Merck) played a big role in this. I connected with a Holistic Vet just days after I gave my dog this horrible medicine and asked if I had given any meds recently. I reported Bravecto. She had suffered a syncope & seizure. She seemed to be better until yesterday when she became listless, lethargic, couldn't walk & her belly was severely swollen. I brought her into the ER, in which the prognosis wasn't good.

She was drowning, bleeding internally and needed her spleen removed & wouldn't survive the surgery.

The Vet I connected with & other pet owners I've spoken to stated that Bravecto caused some nasty side effects & this drug should be pulled off the market. My baby was so healthy until I gave her this drug. She died less than one month after giving this med & her health declined drastically until now she is gone.

Note: This case has been officially reported to the producer MSD/MERCK
