Prince (left)

Danette Hvalø shared the message of **Maria Jämtenstål**

10 juli 2016 - Another one who lost for Bravecto. Just sharing !!!!!

"Today I called the vet with the Prince autopsy report and there was so much to take in. The tears just sprayed, I did not want this.

I miss you, but one day we'll be together again

My Prince died of blood poisoning after an infection of the intestine burst (quickly explained)

Why this happened? Judgment of the autopsy and all veterinarians believe that all this is because the damn tablet bravecto. A hell of a tick tablet has probably killed my best friend!

Report to those submitted today and the tablet will never be used again!

We will never know 100% but since there is no other explanation as I write this out!

Rest soft my most beautiful angel Prince We miss you here at home and we will never forget you."
