This is Little Man, (Red Heeler) Australian cattle dog ~ my best friend

Midge Martin (Luweeza) -

I gave my dog "Little Man" the prescribed dose January 7th (evening) 2016.

He seemed fine that night. The next day, he seemed a little sluggish, by that afternoon he had passed away.

I went outside for a couple hours doing chores, and when I returned back into the house, he was laying dead on his blanket.
